Jason Dukleth
Fullstack Web Developer

JavaScript / PHP / Node developer with 7 years of industry experience. I have led teams, mentored rising stars, and co-developed an e-commerce platform and other enterprise projects. I pride myself on being teamwork-oriented, an avid learner and a problem solver who takes initiative.

WORK EXPERIENCE

Lead Web Developer
Software Alternatives

02/2013 – Present   *Sioux Falls, SD*

Achievements/Tasks

- Developed & extended integrated enterprise websites; including e-commerce, rentals, exchanges, quote requests, invoice approval, financial dashboard, document management, timetracking, advanced configurators, and ordering systems.
- Helped modernize the company with Git, REST APIs, command-line DevOps, and modern JS frameworks.
- Led the web team for 3 years. Managed 32 code repositories at once. Completed tasks with little supervision. Had 2 college instructors shadow me to learn our tech stack.
- Worked closely with clients & implemented business requirements. Worked hand-in-hand with specialists.

PROJECTS

eComEdge E-Commerce Platform
Deployed to Precision Reloading, T&R Electric, Ag Spray Equipment & Precision Fishing. Developed using JavaScript, PHP, SQL and later improved sections with Vue.js / Nuxt and Node / Express. I co-created this e-commerce platform as a junior developer and later led & modernized our team with Git, REST APIs, updated web stack, and command-line DevOps. Photoshopped and made a prototype of v2 with Vue.js, Nuxt, Vuetify & Node.

Paige's Music Instrument Rental & Exchanges
Created an online rentals process for a business which delivers instruments & supplies to hundreds of schools each week. Co-developed and integrated this website into our enterprise software suite. This is a JavaScript-heavy single-page app with PHP backend. I was also tasked to develop an exchange program for the instruments and delivered the website in a timely manner.

T&R Electric Job Application Site
Asked to improve the hiring process for the largest supplier of remanufactured transformers in the US. Developed a six-section, single page app with Vue.js, Vuetify, and Node.
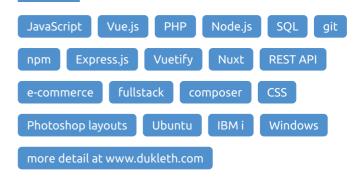

Fimco Industries Invoice Approval
Tasked to create a web interface and API for a large accounts payable team. Integrated it with our existing enterprise software suite. Safely scripted image manipulation on 400 gigabytes worth of invoice documents. Developed as a single-page app with JavaScript & PHP.

Other Projects
I have created & contributed to many other websites including: document management for 5 companies, quote management for T&R Electric, financial dashboard for Kreiser's Medical and Syverson Tile & Stone, my Vue.js portfolio @ www.dukleth.com, Timeclock for Formatop Company, Luverne Public Schools and 3 supplementary sites, e-commerce for David's Bridal and Rexcraft, main site for O'connor Heating & Cooling, and several other hobby websites.
